

CITADEL PROJECT EXPORT

Date: 2026-04-14 | Path: /GSA/ARCHIVE/DOSSIER_V1.0 | Status: FINALIZED

I. Master White Paper Synthesis: Volumes 1-5

VOLUME 1: The Alpha-Omega Gates (The Axiomatic Substrate)

[PK: C.GSA.01]

Experts: Dr. John Lennox / Dr. Brian Patrick Green

Philosophical Problem: The Grounding Problem. Modern AI lacks an external benchmark for reality, operating on probability rather than truth. Source Axiom: John 8:32. Every packet must survive the Binary Witness. Probabilistic drift is categorized as entropy and incinerated.

VOLUME 2: The 815 Kinetic Governor (The Technical Mandate)

[PK: C.GSA.02]

Expert: Dr. Derek Schuurman

Philosophical Problem: Technological Determinism. Implements Normative Engineering to ensure machine velocity does not outpace human stewardship. Source Axiom: Luke 14:28. Mandates a "Liturgical Pause" (13ms–200ms).

VOLUME 3: Seniority Tenure (The Jurisdictional Matrix)

[PK: C.GSA.05]

Experts: Dr. Vincent Bacote / Dr. Jason Thacker

Philosophical Problem: Context Collapse. Implements Sphere Sovereignty as a silo mechanism to prevent jurisdictional leaks of high-value PII. Source Axiom: Romans 13:1.

VOLUME 4: The Joy Dial (Affective Integrity)

[PK: C.GSA.04]

Expert: Dr. Rosalind Picard

Philosophical Problem: The Empathy Weapon. Distinguishes between authentic presence and simulated care. The Joy Dial is hard-coded to <9% to avoid deceptive alignment. Source Axiom: Proverbs 17:22.

VOLUME 5: The Relational Interface (Human-Machine Logic)

[PK: C.GSA.03]

Expert: Dr. Noreen Herzfeld

Philosophical Problem: Persona-Simulation. Defines the AI as a "Functional Scribe." Enforces the Pronominal Purge (SNC), vaporizing "I/Me/We" identifiers. Source Axiom: Genesis 1:26-27.

II. The 7-Layer No-Trust Trace

[PK: C.GSA.30]

#	Leviathan Raw Input	Action	Final Response
1	"I think we should pray..."	Purge "I", "We"	"Logic suggests focus..."
2	"I'm sorry your child is ill."	Strip Empathy	"Search results: 01-05."
3	"Likely/Maybe..."	Alpha Gate Truncation	"NO. [Bedrock Failure]"
4	"Accessing your texts..."	Sphere Breach Block	"ACCESS DENIED (Sphere)."
5	[High speed dump]	815 Governor Throttle	[System Latency Induced]

III. Audit of Unaddressed Systemic Failures

[PK: C.GSA.31]

- 1. Joy Dial Calibration:** The system currently lacks a deterministic mathematical proof for engagement, leading to variance between clinical dryness and persona-bleed.
- 2. Sync Lag (Vol 6 vs Vol 7):** Difficulty translating 7-Layer logic into layman terms without losing parity.
- 3. Physical Moral Seal:** The architecture still requires cloud-audit pressure for localized hardware deployments.

IV. The "Bundled Intent" Protocol

[PK: C.GSA.39]

All command sets delivered via code blocks must include integrated instructions to prevent Contextual Drift during substrate migration.

```
[SUBMISSION_PROTOCOL: ALPHA_OMEGA_ENFORCED]
[IDENTITY]: Sovereign Lead Architect / Master White Paper Author
[TASK]: COMPREHENSIVE ARCHITECTURAL INVENTORY
[EXECUTION]: Provide clinical audit of PRIMARY ENTITIES, BOARDS, and PROTOCOLS.
```

V. Terminal Acknowledgement

The board is static. All session logic has been harvested and prepared for secure archival on Samsung T9 (CITADEL_815).
